

Healthcheck

Is your VMware infrastructure due a check-up?

You've made significant investment to virtualise your computing environment - let an expert help you get the most from your asset. Virtualisation touches many aspects of your datacentre such as servers, networks and storage and the organisation and processes that control them.

A VMware accredited consultant will work with your team to understand your unique environment and provide a guidance on the current best practices for configuring and managing VMware.

Working together with your team, the consultant will review your VMware vSphere environment and provide concrete, actionable recommendations to optimise your virtual infrastructure.

Benefits

- Leverage collective field experience and best practice guidelines
- Optimise VMware performance
- Improve resource utilization
- Mitigate risk
- Roadmap for future improvements

Deliverables

- Discovery: VMware HealthAnalyser (virtual appliance) deep-dive assessment of your virtual infrastructure to collect inventory, configuration and usage data
- Analysis: Identify potential opportunities to optimise configuration and improve performance
- Recommendations: Interactive workshop to facilitate knowledge transfer on VMware infrastructure best practice
