

# Desktop Deployment Services

## Delivering effective desktop deployment services to the NHS

**BDS Solutions offer a complete range of desktop solutions tailored to suit your needs. A specialist PC deployment team is guided and managed by an experienced Technical Consultant, making BDS Solutions uniquely positioned to offer the highest level of services and maximise effectiveness of existing infrastructure solutions.**

BDS will help you with:

- Requirements Analysis
- Business Case Development
- Technical Design
- Deployment

**Planning services**—Solution design including: Active Directory preparation, Group Policy design (including integration of NHS Best Practices) and analysis of infrastructures

**Latest Technologies**—As a Microsoft Gold Partner, BDS Solutions can support all current Microsoft environments including Windows 7, Active Directory 2008 R2, 2012 and Remote Desktop Services (RDS)

**Image Management**—A standardised desktop environment can be prepared using the Microsoft Deployment Tools for Lite or Zero Touch installation. Prepared reference machines can be captured and deployed via various solutions including System Center Operations Manager (SCOM), Microsoft System Center Configuration Manager (SCCM) or Windows Deployment Services (WDS).

**Centralised Administration**—Ensure that the majority of configuration tasks are automated utilizing various technologies including; Preconfigured repackaged applications, Windows Scripting, Group Policy and Group Policy Preferences (only available with a Windows Server 2008 DC)

### **Project Management/User**

**Communications**—The BDS Solutions Project Support Office can be engaged to facilitate planning and communicated with affected end users. Projects are managed using the government approved PRINCE2 model. Field engineers can provide users with training on any updated platform.

**Security**—Hard Disk Drive encryption using BitLocker and the installation and configuration of VPN client, anti-virus and firewall solutions.

**Physical installation**—All computer hardware and peripheral devices can be installed, configured and secured, such devices include; printers, scanners, PDA's and Medical Equipment (where specialist calibration is not required)

**Advanced configuration**—Updating of AD including the creation of OU's, amendments to login scripts etc. at the time of installation to minimise any disruption to users.
